Required for: September 2026

Closing date: 28th August 2026

Interviews: w/c 31st August and 7th September 2026

St Claudine's Catholic School for Girls is a highly-successful Catholic girls' comprehensive school (ages 11-19), where behaviour is outstanding and students are educated via a rich and diverse, holistic curriculum to become confident, articulate and independent young women.

Learning at St Claudine's is rooted in the Gospel values in a warm, supportive and nurturing community. Even though we are a Catholic School, it is not a requirement to be Catholic and our international community welcomes staff and students of all faiths and none.

We require a skilled and knowledgeable science technician to support the work of our busy and successful science department. Science is a very popular subject and is taught throughout the school to A level. Chemistry, Biology, Medical Sciences and Applied Human Biology are very popular option choices in our 6th Form.

A good working knowledge of prepping for practical science experiments and demonstrations is essential as well as a sound knowledge of working safely in a laboratory with chemicals.

Further details of the school and this post are available on the school website:
